Hyperphosphatasia with Mental Retardation

This disorder is very rare and is characterised by severe learning difficulties, developmental delay and behavioural problems and seizures.

We are unable to write a summary on this condition for one or more of the following reasons:

a) there are only a small number of cases of this disorder;
b) there is insufficient information available for us to confidently write a summary;
c) we are unable to corroborate information received.

However we do have some limited information on this disease and to obtain this please contact CLIMB.

This information is fully sourced and referenced, for more detailed information and references please contact CLIMB by email, letter or telephone.
